

1. According to Cummins (1983), it usually takes longer for _____ (移民学生) to reach _____ (学术准则) in a second language than to acquire _____ (人际交流) skills required for day-to-day conversation.
2. Existing research on _____ (影响...的因素) academic achievement of students in higher education _____ (揭示) a number of factors in _____ (多个维度).
3. These factors that were identified in the literature are _____ (适用于) both domestic and international students in higher education.
4. However, there are other factors involved _____ (当涉及...时) the international students' academic performance in higher education, since international students have unique characteristics that _____ (令他们区别于) domestic students.
5. These findings indicate that English proficiency _____ (与...有间接联系) academic performance of international students through its impact on other factors in the _____ (社会文化和心理学维度).
6. Self-perceived English language proficiency and multilingualism were the _____ (主要自变量) examined within this study.
7. There was a _____ (较弱的关联) between overall TOEFL scores and mean GPAs.
8. _____ (与此前不一致的是), Kerstijens and Nery (2000) found no _____ (统计学关系) between IELTS and GPA.
9. The findings were _____ (存在矛盾), _____ (意味着) that English proficiency measured solely by TOEFL or IELTS scores cannot _____ (可靠地预测) international students' academic success.
10. _____ (缺少有关...的研究) on academic success of multilingual students who speak two or more languages, _____ (暗指) cognitive advantages or disadvantages of being multilingual in American higher education.
11. Sixty-five surveys were _____ (随机发放), out of which 59 were _____ (交回).
12. Participants were given _____ (知情同意书), which provided information _____ (关于) the study, including the contact information of the principal investigator.
13. This study intended to _____ (在现有研究基础上做出贡献) on the relationship between English language proficiency and academic performance of international students, and to _____ (填补研究空白) on the relationship between the number of languages spoken and academic performance.
14. Hence, the unique experiences of international students in the process of cross-cultural adjustment should _____ (被纳入考量).
15. This is an area that _____ (需要样本量更大的进一步研究), in order to _____ (就...得出结论) the effect of multilingualism on academic performance.

1. According to Cummins (1983), it usually takes longer for **immigrant students** to reach **academic norms** in a second language than to acquire **interpersonal communication** skills required for day-to-day conversation.
2. Existing research on **factors contributing to** academic achievement of students in higher education **reveals** a number of factors in **multiple dimensions**.
3. These factors that were identified in the literature are **applicable to** both domestic and international students in higher education.
4. However, there are other factors involved **when it comes to** the international students' academic performance in higher education, since international students have unique characteristics that **distinguish them from** domestic students.
5. These findings indicate that English proficiency **is indirectly associated with** academic performance of international students through its impact on other factors in the **socio-cultural and psychological dimensions**.
6. Self-perceived English language proficiency and multilingualism were the **main independent variables** examined within this study.
7. There was a **moderately low correlation** between overall TOEFL scores and mean GPAs.
8. **Inconsistently**, Kerstijens and Nery (2000) found no **statistical relationship** between IELTS and GPA.
9. The findings were **contradictory**, **implying** that English proficiency measured solely by TOEFL or IELTS scores cannot **be a reliable predictor of** international students' academic success.
10. **There is a dearth of studies** on academic success of multilingual students who speak two or more languages, **implicating** cognitive advantages or disadvantages of being multilingual in American higher education.
11. Sixty-five surveys were **randomly distributed**, out of which 59 were **returned**.
12. Participants were given **informed consent forms**, which provided information **regarding** the study, including the contact information of the principal investigator.
13. This study intended to **contribute to existing research** on the relationship between English language proficiency and academic performance of international students, and to **fill the research gap** on the relationship between the number of languages spoken and academic performance.
14. Hence, the unique experiences of international students in the process of cross-cultural adjustment should **be taken into consideration**.
15. This is an area that **needs further research involving a larger sample size**, in order to **make conclusions on** the effect of multilingualism on academic performance.
