

Unit 8

Hongmei Pang

- Writing references
- Writing acknowledgement
- Writing appendices
- Writing emails
- Collocation

Good science is not written. It is rewritten.

– R. West, 1928–

References

Function

The References section gives listing of the references that you **actually** cited in the body of your paper.

- **the author element**, including the format of individual author names and of group author names
- **the date element**, including the format of the date and how to include retrieval dates
- **the title element**, including the format of the title
- **the source element**, including the format of the source and how to include database information

- Today variation seems rife.
- ⑩ Computer-based systems for preparing references:
 - ⑩ NoteExpress
 - ⑩ Endnote
 - ⑩ Refworks
 - ⑩ Mendeley
- EndNote (2017) proudly boasts that it includes “more than 2,300 predefined bibliographic styles for leading journals”.

PAST : Paleontological statistics software for education and data analysis

来自 ResearchGate | ♡ 喜欢 0 | 阅读量: 31

作者: Hammer, Øyvind, Harper, David A. T., Ryan, Paul D

摘要: A comprehensive, but simple-to-use software package for executing a range of statistical functions used in quantitative paleontology has been developed. The program, called PAST, runs on standard Windows computers and is available free of charge. PAST integrates descriptive and multivariate statistics, curve fitting, time-series analysis, data plotting, and simulation functions are specific to paleontology and ecology, and these functions are not available in other software packages.

宁波甬江大桥的大挠度非线性计算问题*

钱伟长

(上海大学, 上海市应用数学和力学研究所, 上海 200436)

(我刊编委钱伟长来稿)

摘要: 研究了宁波甬江铁路大桥的大挠度非线性设计计算问题* 提出了非线性方程的叠代近似算法, 同时指出了如果两岸落差约 5m, 两岸跨度约 100m 计算, 则桥梁中间的最大斜度将超过 5%, 这远远超过铁路设计允许的斜度* 为此, 提出了减小路轨斜度的设计方案, 即铁路在两岸都有长度约 1km 斜度为 0.5% 的路基, 使两岸的落差减小到约为原来落差的 $1/10^*$ 这样路轨在跨越甬江时, 其挠度的斜度就会大大缩小, 也在 0.5% ~ 0.6% 之间*

关键词: 大挠度; 弹性模量; 悬臂梁

Facts about Acknowledgements

- The Acknowledgements section of a Ph.D. dissertation is the **most widely read section**.
- Over 90% of respondents were aware of having been acknowledged themselves, a few even keeping a formal record for institutional evaluation.
- One study found that over 50% of their survey of 280 academics generally read acknowledgements when scanning a new paper, often to make a preliminary relevance assessment of the article.
 - measures of “trusted assessorship”
 - instruments of credit and reward
 - revealing hidden influences behind papers

Studies about Acknowledgements sections in research papers

Cronin *et al.* (2003) separated the different parts of an acknowledgement as follows:

- **financial** (recognition of extramural or internal funding);
- **instrumental/technical** (providing access to tools, technologies, facilities, and also furnishing technical expertise, such as statistical analysis);
- **conceptual** (source of inspiration, idea generation, critical insight, intellectual guidance, assistance of referees etc.);
- **editorial** (providing advice on manuscript preparation, submission);
- **moral** (recognising the support of family, friends etc.).

Studies about Acknowledgements sections in research papers

Table 1 The proportions of acknowledgements (%) devoted to different aspects of acknowledgements in *Mind*, *Psychological Review* and the *Journal of the American Chemical Society*

	<i>Mind</i>	<i>Psychological Review</i>	<i>Journal of American Chemical Society</i>
Financial	11	36	46
Technical	4	20	34
Conceptual	69	31	18
Editorial	11	11	1
Moral	1	0	0

Data derived from Cronin *et al.* (2003; 2004)

Common elements in Acknowledgements

- Financial support

This research was supported by a grant from...

- Thanks

I wish to thank A for his encouragement and guidance throughout the project.

- Disclaimers

The interpretations in this paper remain my own.

- Other versions

An earlier version of this paper was presented at a conference.

- Source

This paper is based on the first author's doctoral dissertation.

A Few Goodmen: Surname-Sharing Economist Coauthors*

Abstract

We explore the phenomenon of coauthorship by economists who share a surname. Prior research has included at most three economist coauthors who share a surname. Ours is the first paper to have four economist coauthors who share a surname, as well as the first where such coauthors are unrelated by marriage, blood or current campus.

*For invaluable research assistance, we thank Napat Jatusripitak and Carlos Paez, even though their surnames are quite different from ours. Susannah Tobin, no relation to James, thought up the title. We thank Yoram Bauman and four anonymous referees for valuable feedback. We received no support for this research from any source. The analysis and conclusions set forth are those of the authors and do not indicate concurrence by other members of the research staff or the Board of Governors of the Federal Reserve. Any errors are Goodman's.

Alphabetical Author Order, Intellectual Collaboration, and High-Skilled Migration

Abstract

We study the consequences of alphabetical author order in economics for job placements of economists, based on a context that enables a clean identification. Results using two different data sets both show that, relative to Chinese physicists and statisticians, Chinese economists with surname initials located later in the alphabet tend not to stay in the US and are more likely to work in China. Such effects of surname initials on job placements are cleanly identified and represent a result of alphabetical author order, because in Chinese culture, names are seldom listed alphabetically in contexts other than joint publications in international economics journals.

How Do You Say Your Name? Difficult-To-Pronounce Names and Labor Market Outcomes*

Qi Ge, Stephen Wu

AMERICAN ECONOMIC JOURNAL: ECONOMIC POLICY (FORTHCOMING)

We test for labor market discrimination based on a previously unstudied characteristic: name fluency. Analysis on two recent cohorts of economics PhD job candidates shows that **those with difficult-to-pronounce names are less likely to obtain an academic or tenure-track position and are placed at institutions with lower research productivity.** Discrimination due to name fluency is also found using experimental data from two prior audit studies. Within a sample of African-American candidates (Bertrand and Mullainathan, 2004) and a sample of ethnic Indian, Pakistani, and Chinese candidates (Oreopoulos, 2011), job applicants with less fluent names have significantly lower callback rates.

“We thank Bear, the dog, for helping us randomize the order of all authors who contributed equally to the manuscript.”

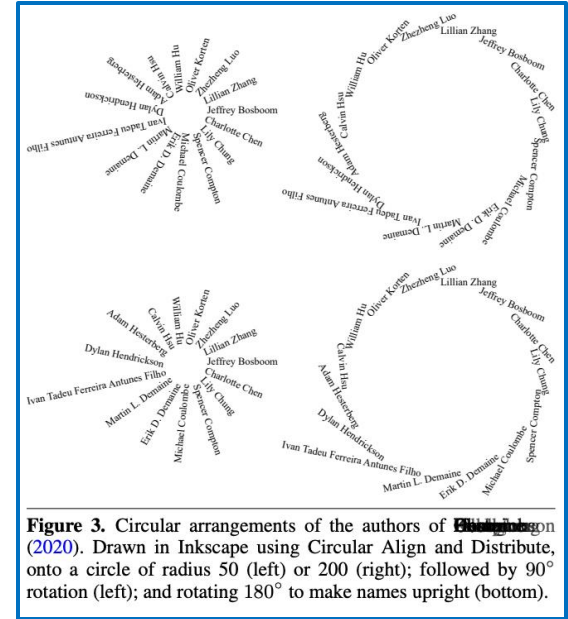

When aquatic ecologist Chelsea Rochman and colleagues learnt that alphabetizing authors can disadvantage those whose names lie at the end, they randomized their author list in the order that a dog ate treats. (*Environmental Toxicology and Chemistry* paper via Twitter)

Every Author as First Author*

Eraktin. IL Deanae

Computer Science and Artificial Intelligence Laboratory
Massachusetts Institute of Technology
Cambridge, MA 02139
edemaine@mit.edu

We propose a new standard for writing author names on papers and in bibliographies, which places every author as a first author — superimposed. This approach enables authors to write papers as true equals, without any advantage given to whoever's name happens to come first alphabetically (for example). We develop the technology for implementing this standard in LATEX, BIBTEX, and HTML; show several examples; and discuss further advantages.

致 谢

首先，我要感谢我的指导老师，对我的毕业设计提出了很多宝贵的意见。如果不是他，我的毕业论文早就写好了。

感谢我的女朋友，在我这四年的大学生涯中从未出现过，让我能够专心学习，顺利完成学业。

感谢我的室友，在我毕业设计期间，给了我很大的帮助，一直鼓励我跳楼，一直用无法完成毕业设计无法毕业来恐吓我，使得我求生欲望更加坚强，才能苟且活到现在。

感谢学校食堂，让我吃不饱睡不着，能够通宵达旦修改论文。

最后，感谢我自己，为了能够毕业竟然一本正经胡说八道了这么多字。明白如果不逼自己一把，永远不知道自己有多牛逼。

“My deepest gratitude goes to my family, mentors, colleagues, research participants, and to my adviser for the unending support in making this research possible. And to all of my friends, without you I would have graduated two years earlier.”

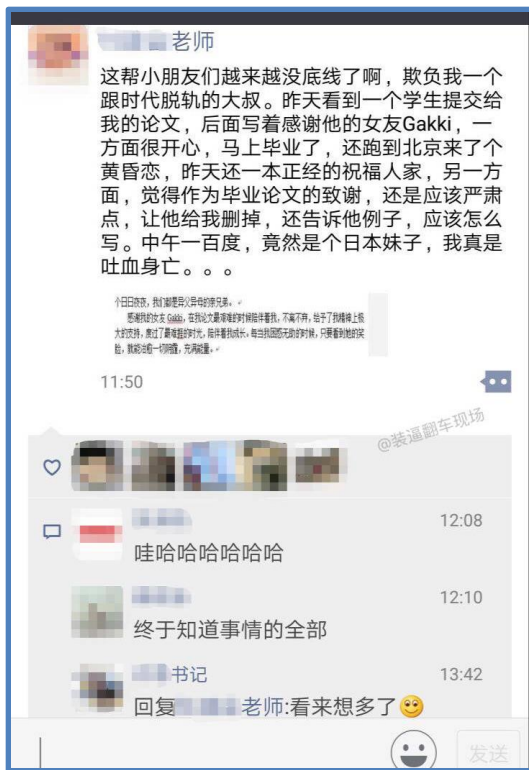

使天各一方，即使不留痕迹，但我们都曾是最亲近的人。感谢我的舍友，我们曾一起度过多少个日日夜夜，我们都是异父异母的亲兄弟。

感谢我的女友Gakki，在我论文最艰难的时候陪伴着我，不离不弃，给予了我精神上极大的支持，度过了最难捱的时光，陪伴着我成长。每当我困惑无助的时候，只要看到她的笑脸，就能治愈一切阴霾，充满能量。

把你女朋友给我删掉

致谢

我真的会谢。

致 谢

感谢国家。

From academic to romantic

Acknowledgments

We acknowledge the support received from the National Natural Science Foundation of China (51706076, 51736004). In addition, Rui Long wants to thank, in particular, the patience, care and support from Panpan Mao over the passed years. Will you marry me?

From academic to romantic

Acknowledgements

The writer sincerely thanks all the students who kindly and patiently took part in this research. Also, the writer wants to express his gratitude to his girlfriend, who, studying in the U.S., provided the writer with valued assistance and suggestions on his paper and presentation.

Move structure of acknowledgements

The writing of an MA thesis is not an easy task.

During the time of writing I received support and help from many people.

In particular, I am profoundly indebted to my supervisor, Dr. James Fung, who was very generous with his time and knowledge and assisted me in each step to complete the thesis.

I am grateful to The School of Humanities and Social Science of HKUST whose research travel grant made the field work possible. Many thanks also go to those who helped arrange the field work for me.

And finally, but not least, thanks goes to my whole family who have been an important and indispensable source of spiritual support.

However, I am the only person responsible for errors in the thesis.

Move 1

1 Reflecting Move

Introspective comment on the writer's research experience

2 Thanking Move

Mapping credit to individuals and institutions

Move 2:1

1 Presenting participants

Introducing those to be thanked

2 Thanking for academic assistance

Thanks for intellectual support, ideas, analyses feedback, etc.

3 Thanking for resources

Thanks for data access & clerical, technical & financial support

4 Thanking for Moral support

Thanks for encouragement, friendship, sympathy, patience, etc.

Move 2:2

3 Announcing Move

Public statement of responsibility and inspiration

1 Accepting responsibility

An assertion of authorial responsibility for flaws or errors

2 Dedicating the thesis

A formal dedication of the thesis to an individual(s)

Move 2:3

Move 2:4

Move 3:1

Very strong thanks (save these for the people who helped you the most):

I would like to express my deepest appreciation to my committee

I'm deeply indebted to

I would also like to extend my deepest gratitude to

I'm extremely grateful to

(Something—my success, the completion of my dissertation) would not have been possible without the support and nurturing of (person).

I cannot begin to express my thanks to, who

Less strong, but very appreciative:

I would like to extend my sincere thanks to ... / I must also thank ...

I would like to thank... / I also wish to thank...

I am also grateful to ... / I'd also like to extend my gratitude to

Many thanks to

Special thanks to

Thanks also to ...

Thanks should also go to ...

I very much appreciate...

Especially/Particularly helpful to me during this time were ____, ____, and ____, who ...

I also had great pleasure of working with

I cannot leave Georgia Tech without mentioning (person), who.

Less strong, but certainly adequate

I'd like to acknowledge the assistance/help/effort of....

I gratefully acknowledge the assistance/help/effort of ...

I'd like to recognize the assistance/help/effort that I received from

After you thank, say WHY you are thanking them in the following ways:

Several people/someone played a decisive role in (doing something for you)

Someone provided you with encouragement and patience throughout the duration of this project

Someone was instrumental in (doing) something for you...

Someone whose help cannot be overestimated....

Someone extended a great amount of assistance...

Someone always supported and nurtured you...

Someone never let you down...

Someone never wavered in their support..

Some adjectives/nouns to describe what these people gave you:

valuable advice / invaluable contribution / suggestions / experience

invaluable insight into (something)

relentless/unrelenting/unparalleled support

profound belief in my work/in my abilities

useful/practice/helpful contributions

practical suggestions

helpful advice

unwavering support/unwavering guidance

constructive criticism/advice

ingenious/insightful suggestions

knowledge (extensive knowledge, unparalleled knowledge)

patience that cannot be underestimated

guidance

Appendix

- **Function**

An Appendix contains information that is non-essential to understanding of the paper, but may present information that further clarifies a point without burdening the body of the presentation. An appendix is an *optional* part of the paper, and is only rarely found in published papers.

Some examples of material that might be put in an appendix (not an exhaustive list):

- raw data
- maps (foldout type especially)
- extra photographs
- explanation of formulas, either already known ones, or especially if you have "invented" some statistical or other mathematical procedures for data analysis.
- specialized computer programs for a particular procedure
- full generic names of chemicals or compounds that you have referred to in somewhat abbreviated fashion or by some common name in the text of your paper.

The final check

- Print a hard copy of your manuscript. Don't rely on reading it on screen.
 - One study showed that people who are proofreading on paper can do it anywhere from 20 to 30% faster than those reviewing the manuscript on screen.
- Check for all types of mistakes in English: grammar, vocabulary and spelling.
- Ensure you have followed the style guide.
- Ensure your paper is as good as it could possibly be the first time you submit it.
- Check your manuscript for readability and logic.
- Check for accuracy and consistency.
- Get a peer to read through your paper.
- Take editorial comments seriously.
- Triple check everything.

Writing is a high-level intellectual activity.

No one learns all there is to learn about writing, once and for all.

Writing is all about revision.

My thesis is written in

我很会说 为什么写不出来

I can talk. How come I can't write?

写作 很难

Writing! It's hard!

Reading research papers

1. Introduction

- **Establishing the research context:**
 - academic writing (AW) for English as an Additional Language (EAL) learners
 - Ferris and Hedgcock's (2005) call for a framework that analyzes the strategies and cognitive operations involved in drafting coherent, meaningful discourse
- **Research question:**
 - In what ways are multi-draft portfolios useful for the teaching, learning, and assessment of AW?"
- **Identifying key issues:**
 - The value of peer collaboration
 - The importance of reflexivity
 - Portfolio assessment's formative potential
- **Providing a framework for the study:**
 - Integrate the insights from these core issues into a description of student learning within an AW program

2. Theoretical Background

- **Focus on Process:**
 - the effectiveness of multi-draft portfolios within a process-focused pedagogy
- **Approaches Impacting Process:**
 - Cognitivism: writing as a learned process, with the teacher acting as a facilitator in a cooperative environment
 - Contrastive rhetoric: the influence of cultural norms on writing organization
 - Genre pedagogy: the importance of understanding readers and their expectations, shaping texts to meet these expectations within target discourse communities
 - Social constructivism: the role of collaboration and the negotiation of identities in the writing process
 - Post-structuralist: question and even transform the activities involved in academic writing

3. Portfolios in the AW course

- **Course Context**
 - A 14-week module within a bachelor of arts (EAL) program
 - Aims to prepare students for academic success in their future academic community
- **Course Structure**
- **Portfolio Tasks**
 - A variety of text types, including academic description, evaluation, and argumentative essays
- **Portfolio Procedure**
- **Reflective Component**
- **Assessment Criteria**

4. Methodology

- **Participants:**
 - 41 participants
 - diverse in terms of gender, age, and cultural background
- **Instruments:**
 - Focus Group Interviews: the primary data source
 - Reflections on Portfolio Tasks
- **Data Analysis:**
 - Focus Group Interviews: locating recurrent themes and organizing data
 - Reflections on Portfolio Tasks: triangulation purposes, complementing the insights gained from the focus group interviews

4. Methodology

- **Participants:**
 - 41 participants
 - Diverse in terms of gender, age, and cultural background, representing countries
- **Instruments:**
 - Focus Group Interviews: the primary data source
 - Reflections on Portfolio Tasks
- **Data Analysis:**
 - Focus Group Interviews: locating recurrent themes and organizing data
 - Reflections on Portfolio Tasks: triangulation purposes, complementing the insights gained from the focus group interviews

5. Findings and Discussion

- **Theme 1: The Challenge of Referencing:**
 - The acquisition of referencing techniques and conventions
 - The importance of explicitly teaching referencing skills within the context of academic literacy development
- **Theme 2: Understanding Discursive Forms:**
 - Recognizing Thetic Structures
 - Reacting to Western Conventions
 - Learning from Generic Text Types
- **Theme 3: The Learning Capital of Portfolios:**
 - Editing
 - Planning
 - Reflectivity
- **Theme 4: The Impact of Teacher Feedback:**
 - Instrumental in improving their writing skills and addressing specific areas of concern
 - Motivating students and fostering a positive attitude towards academic writing

6. Conclusion

- **The Value of Multi-Draft Portfolios:**
- **Academic Literacy Factors:**
