

Comment and Feedback

Hongmei Pang

So many papers deserve to be better written than they are. If the research is worth writing up, it's worth writing up well.

CARS Model: Put the sentences in correct order

- a. Furthermore, governments, foundations, non-profit organizations, and other stakeholders continue to work on how to provide cost-effective community-based services to members of the society including the elderly.
- b. In particular, the study sought to provide an avenue for them to communicate their understanding of university-community agency collaborations, and identify how their agencies can work collaboratively with the university.
- c. According to the U.S. Bureau of the Census, it is anticipated that if this trend in growth continues, by the year 2030 there will be approximately 70 million Americans aged 65 or over.
- d. One approach has been an emphasis on community collaborations to address the planning and delivery of such services.
- e. Little is, however, known about participants' views of university-community collaborations.
- f. Several studies have examined issues related to the present and future provision and quality of community-based services for the elderly (Kelly, Knox & Gekoski, 1998; Buys & Rushworth, 1997; Damron-Rodriguez, Wallace, & Kington, 1994; Krout, 1994; Kuehne, 1992; Benjamin, 1988; Soldo & Agree, 1988; and Mahoney, 1978).
- g. Human-service agency workers are major participants of university-based collaborations; hence the purpose of this study was to investigate their views of community-based services to the elderly in northwest Ohio.
- h. Funding agencies (e.g., U.S. Department of Housing and Urban Development [HUD]) have encouraged university-community collaborations.
- i. The growing size of America's population of seniors has drawn attention to their economic and social well-being.
- j. America's population is growing older.
- k. An example is HUD's Community Outreach Partnership Centers initiative, which involves university faculty, staff, students, and community residents and agencies/groups as partners in the development and implementation of research/community programs.

CARS Model

- j. America' s population is **growing older**.
- c. According to the U.S. Bureau of the Census, it is anticipated that if **this trend** in growth continues, by the year 2030 there will be approximately 70 million Americans **aged 65 or over**.
- i. The **growing size** of America' s population **of seniors** has drawn attention to their economic and social well-being.
- f. Several studies have examined issues related to the present and future provision and quality of **community-based services** for **the elderly** (Kelly, Knox & Gekoski, 1998; Buys & Rushworth, 1997; Damron-Rodriguez, Wallace, & Kington, 1994; Krout, 1994; Kuehne, 1992; Benjamin, 1988; Soldo & Agree, 1988; and Mahoney, 1978).
- a. **Furthermore, governments, foundations, non-profit organizations, and other stakeholders** continue to work on how to provide cost-effective **community-based services** to **members of the society including the elderly**.
- d. One approach has been an emphasis on **community collaborations** to address the planning and delivery of **such services**.
- h. Funding **agencies** (e.g., U.S. Department of Housing and Urban Development [HUD]) have encouraged **university-community collaborations**.
- k. An example is HUD' s Community Outreach Partnership Centers initiative, which involves **university faculty, staff, students, and community residents and agencies/groups** as partners in the development and implementation of research/community programs.
- e. **Little is, however, known about** **participants' views of** **university-community collaborations**.
- g. **Human-service agency workers are major participants of university-based collaborations; hence the purpose of this study was to investigate their views of** **community-based services** to **the elderly** in northwest Ohio.
- b. In particular, the study sought to provide** an avenue for **them** to communicate their understanding of university-community agency **collaborations**, and identify how their **agencies** can work collaboratively with the university.

2. 文献不足或无效综述

Students:

- ✗ Similarly, students' perception of FS was assessed by Rhodes (2010). Nine questions were asked in turn and the answers were analyzed. In terms of the nine factors examined, roughly half the group was positive about each factor and half negative about each factor.
- ✗ It showed the user's need well and analyzed the correlation between students and library used.
- ✗ ...believed that there is a relationship between self esteem and ...

fail to mention its significance and how it contributes towards making your point

Structure your literature review

NOT to provide a shopping list of past papers

TO state:

1. what others have done or what you did in a previous paper
2. the downside / limit of previous studies
3. your solution / improvement

Literature review

Read these eight summaries of research papers on self-citing. Organize the literature review section.

- 1) Snyder Bonzi (1989). Patterns of self-citation in six disciplines. 9% of all citations were self-citations: 15% in the physical sciences, 6% in the social sciences and 3% in the humanities.
- 2) Bonzi Snyder(1991). A study of 51 authors in the natural sciences revealed only a few differences in motivation between citing oneself and citing others.
- 3) Phelan(1999). A study of the citing practices of 56 highly-cited authors in the field of education. Only 2 of the 56 did not cite themselves over a 12-year period. At the other extreme, 154 out of 280 citations(55%) received by one author were the outcome of self-citations.
- 4) White(2001). The most important citer motivation is to project one own writing (and reading) by linking earlier work to later work. In this sense, a certain amount of self-citation is both natural and inevitable.
- 5) Hyland (2003). Self-citations may arise from three kinds of motivation: 1) a natural result of the cumulative nature of an individual's research; 2) a need for personal gratification; and 3), its value as a rhetorical device to increase an author's visibility and reputation.
- 6) Medoff (2006). This study of 400 economics articles showed that an author's self-citations did not have a statistically significant effect on that article's total number of citations.
- 7) Falages Kavvadia(2006). 17% of references in clinical science were self-citations, a figure that rose slightly to 20% in basic science.
- 8) Fowler Aksnes(2007). A macro study of more than a half million citations to articles by Norwegian scientists in the 1981-2000 period. The average citation rate was 11%, although there were wide individual variations. They then showed that the more authors cite themselves the more likely they are to be cited by others. However, they note that there are currently no penalties for frequent self-citing. These results, they conclude, question the use of citations to evaluate performance.

✓ Numbers/frequency/facts

- 8: a half million, average citation rate
- 1: six disciplines
- 7: clinical science VS basic science
- 3: education

✓ Motivation

- 5: three kinds of motivation
- 4: natural and inevitable
- 2: a few differences in motivation between citing oneself and citing others

✓ Effects

- 8: positive correlations
- 6: no statistically significant effect on the article's total number of citations

✗ Produce simple undigested lists of what has been done

- ✓ Impose order on the material
- ✓ Engage critically with the literature
- ✓ Use topic sentences
- ✓ Link studies with signpost words

➤ agreement:

concur with, similarly

➤ discrepancy:

however, in contrast to

- ✓ Present further analysis

Critical thinking

- Demonstrate your critical thinking with language. Do not simply repeat what others said.

☐ As AAA (2017) said,...

☐ According to...

☒ AAA **helpfully** found that...

☒ BBB **unconvincingly** argued...

According to ...

VS

convincingly
applicably
valuably
suitably
helpfully

- Which (really necessary?)

Critical thinking

- Synthesize/mix your analysis
- Point out how studies relate to one another; link studies.
 - AAA (2017) usefully **disagrees by compellingly** providing the data...
 - AAA (2017) **helpfully corroborated** BBB's findings in another study by proving...
 - Despite these researchers' useful findings, AAA's study(2017) was **most applicable** to the purpose of this study because...

Critical thinking

Oppenheimer **famously said** that he regretted building the atom bomb and died in despair.

Academic style

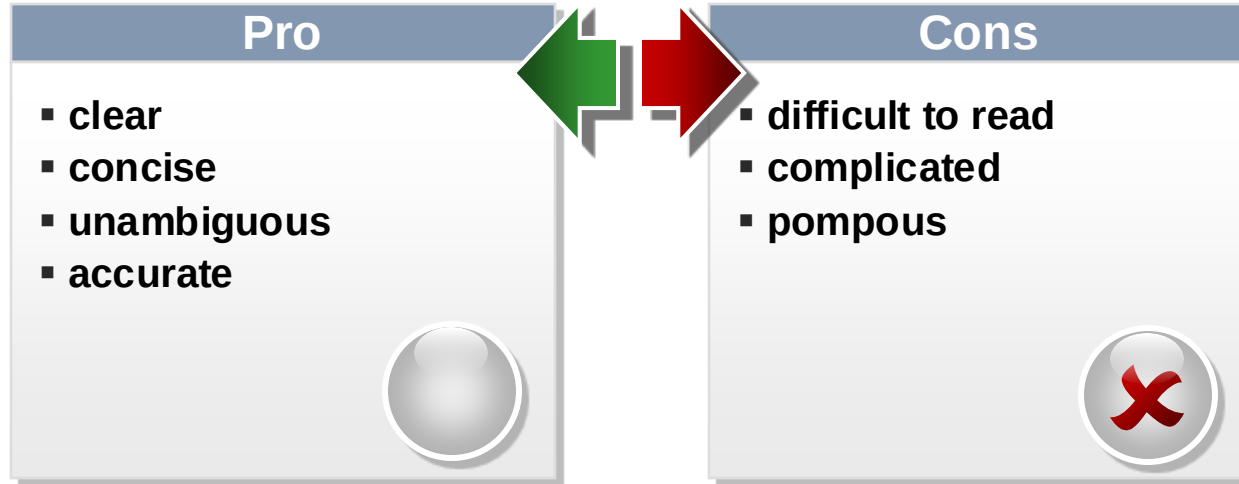

4. 语言口语化

Academic style

- Scintillate, scintillate globule
aurific
- Fair would I fathom thy nature
specific
- Loftily poised in the ether
capacious
- Strongly resembling a gem
carbonaceous

- twinkle twinkle little star,
- how I wonder what you are
- up above the world so high
- like a diamond in the sky

Academic style

tentative statements

We need to use tentative statements such as *tends to*, *appears to*, *suggest that*, *would seem to*, *the audience indicates*... rather than direct, categorical ones that overgeneralise:

- Write: This **tends to** occur whenever there is a downturn in commodity prices.
- not: This occurs whenever there is a downturn in commodity prices.

Academic style

Use only the full forms of words, not contractions, eg., do not instead of don't; cannot instead of can't:

- Write: Unemployment figures **will not** improve until the economy is stronger.
- not: Unemployment figures won't improve until the economy is stronger

Nominalised phrasing

Academic writing usually has more nouns (naming words) than verbs (action or being words).

- Write: Germany's **invasion** of Poland in 1939 was the immediate cause of the outbreak of the Second World War.
- not: Germany invaded Poland in 1939. This was the immediate cause of the Second World War breaking out.

- Write: The recession occurred because of an **over-production** of consumer goods.
- not: The recession occurred because too many consumer goods were produced.

- Write: The rapid **increase** in crime is causing concern.
- not: Crime is increasing rapidly and causing concern.

Nominalised phrasing

- The government **banned smoking** in public places in 2007. Since then, fewer people have been admitted to hospital for smoking-related diseases.
- **The ban on smoking** in public places in 2007 has led to a fall in hospital admissions for smoking-related diseases.

Academic style

Few direct questions

- Write: The department needs to consider how costs can be lowered.
- Or Consideration needs to be given to the ways in which costs may be lowered.
- not: What can be done to lower costs?

Academic style

- Increasing numbers of students are choosing Media Studies as their university subject. What is the reason for this? Many students believe ...
- Increasing numbers of students are choosing Media Studies as their university subject. The reason for this is that many students believe ...

Third person pronouns (writing impersonally)

To write in an objective manner, we usually use third person pronouns such as they, he, she, and it, not I, we or you. For example:

- Write: **It is recommended** that...
- Not: I recommend that...
- Write: **It was found** that...
- not: I found that...

Third person pronouns (writing impersonally)

- Neither qualitative interviews nor focus groups are likely to **give you** easily quantifiable, factual or objective data.
- Neither qualitative interviews nor focus groups are likely to **provide** easily quantifiable, factual or objective data.
- As **you can see** from the data, two-thirds of respondents are satisfied with the current provision.
- As **can be seen** from the data, two-thirds of respondents are satisfied with the current provision.

Academic style

Avoid informal expression in academic writing

- | | |
|---|---|
| ① stop using “and, also, but, so”
to start sentences | ① furthermore, likewise, however,
therefore |
| ② what's more | ② in addition to, furthermore |
| ③ on the one hand, on the other
hand | ③ only used when contrast |
| ④ As mentioned in previous
sections ... | ④ As discussed/analyzed in previous
sections ... |

Academic style

- The settlers got ill after drinking polluted water.
- The settlers **became** ill after drinking polluted water.
- Doris Lessing got the Nobel Prize in 2007.
- Doris Lessing **was awarded** the Nobel Prize in 2007.
- The study participants reported that they got better after the first course of treatment.
- The study participants reported **that their health improved** after the first course of treatment.

Appropriate formal negative forms

More formal versions of negative forms need to be used:

➤ Write:	no	not:	not...any
	little		not...much
	few		not...many

Academic style

- Write: The analysis yielded **no** new results.
- not: The analysis did not yield any new results.

- Write: The recent budget allocated **little** funding to the program
- not: The recent budget did not allocate much funding to the program.

- Write: There seems to be **few** viable solutions to this problem.
- not: There does not seem to be many viable solutions to this problem.

Prepositional verbs VS single verbs

- Researchers **looked at** the way strain **builds up** around a fault.
- Researchers **observed** the way strain **accumulates** around a fault.

Prepositional verbs VS single verbs

- Most of the patients reported that they **put on weight** after taking the new medication.
- Most of the patients reported that they **gained weight** after taking the new medication.
- The proposal for regional representation was **turned down**.
- The proposal for regional representation **rejected**.

Describe information using positive frames.

-  The app won't disrupt people's daily routine.
-  The app fits perfectly into people's daily routine.

- Write in academic style

Spoken text

Nowadays companies are finding that they have to change the way they do things and they're finding that human resources planning is really helpful when they have to do this. One reason why it's helpful is because it can help the companies work out what the issues are and then, when you've done that, it can help you make up your mind what you're going to do about it. Basically, human resource planning is what you do when you're going through ...

Written text

As companies experience the need for change, they often apply human resource planning to define the relevant issues and develop responses to them. Broadly defined, human resource planning is the process of analysing an organisation's human resources needs under changing conditions and developing the activities necessary to satisfy those needs.

5. APA

6. Method 部分信息严重缺乏，时态混乱。

7. language problems

- 单复数一致
- 滥用代词: we, you, they, it
- **As first-year university students ourselves, we** wonder ...
- **You** cannot simply distinguish ChatGPT from a human.
- As **they** provide standards for comparison between students, grades give **them** pressure and motivation to study.
- As far as I'm concerned, the benefits of students employing laptops in the classroom outweigh the drawbacks, **it** identifies benefits related to convenience, engagement and flexibility.

Language

- Be consistent with key words.

- Researches vs Research

- “Research should always be used as a *mass noun*, and its verb must be singular. Some writers attempt to force research to take a plural form (researches); however, this usage is incredibly rare, and it will almost certainly trouble a reviewer” .

-  Researches were carried out...
-  Research was carried out

- Be careful when using transitional words.
 - “**Above all**” should be used near the end of the paper rather than at the beginning.
 - “**By the way**” is not a good way to conclude a sentence.
 - “**what’s more**”
 - “**so much for** ”
 - **Therefore; However**
- Vocabulary choice
 - thought, said, imply
- Do not use judgmental language.
 - to our surprise

- Don't be too “full” or “absolute” in your writing.
 -  Laptops can help students learn better.
 - Laptops can **definitely** help students learn better.
 - do, indeed, certainly, of course...
- Be consistent
 - tense choice
 - singular or plural
- A lot of grammar mistakes are due to carelessness or maybe just unintentional, you can ask your friends or peers to help you go through your paper once or twice before handing it in. This will help make your paper look much better.
 - Grammarly

Writing tips

1. Take your writing seriously. Be committed. Be engaged.

2. Reading based approach

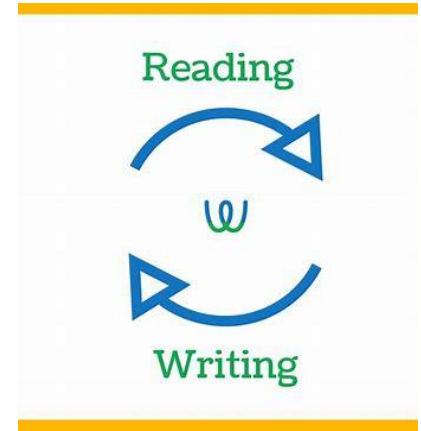

WORKING LIFE

Fortune favors the well read

Julian G. West

Reporting results

The standard approach to this section is to describe the results in a systematic and ordered way. A researcher will highlight and comment on key findings. Comments will often be illustrated with data. This may comprise quotations from primary sources, or data likely to consist of tables and figures, or graphs. These often take the form of the table or figure and indicates its content. The table or figure point out and describe the relevant data. The table is numbered and given a title. More elaborate figures are placed in the Discussion section. In research writing, their results as they are presented, are often combined with the Discussion section.

Referring back to the research

Referring to data in a table or chart

Referring to data in a table or chart

Table 1 Figure 1	shows compares presents provides	an overview of ... the experimental data on X. the summary statistics for ... the breakdown of X according to ... the intercorrelations among the nine measures of X. the results obtained from the preliminary analysis of X.
The table below illustrates The pie chart above shows The top half of the table shows The bottom half of the table shows	some of the main characteristics of the ... the breakdown of ...	
As shown in Figure 1, As can be seen from the table (above), From the graph above we can see that It can be seen from the data in Table 1 that	the X group reported significantly more Y than the other two groups.	
The results of the correlational analysis The themes identified in these responses The results obtained from the preliminary analysis of X	are shown are set out are presented can be compared are summarised	in Table 1. in Figure 1.

5: Writing portfolio

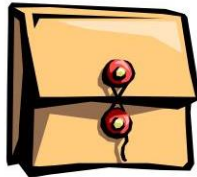

多稿写作

过程写作

WRITING PORTFOLIO

- Showcase for best writing
- Record of writing growth

In general, students benefit the most when they receive feedback while they are still working on a paper.

Hamp-Lyons & Condon (2000) argue that "portfolios provide a broader measure of what students can do, and because they replace the timed writing context, which has long been claimed to be particularly discriminatory against non-native writers".
